### Interim Management Business & Financial Controlling

from value-oriented corporate management to traditional costing  
supply-chain processes & capital market orientation  
in accordance to German GAAP, US GAAP and IFRS

### My Implementation Expertise is Your Advantage

Alexander Altmeyer Interim Management GmbH - aAIM - provides you with interim management in the business & financial controlling areas.

It does not matter whether you are a medium-sized company or a large corporation; using aAIM allows you to optimise your personnel resources in two ways, regardless of the size of your company:

A suitably qualified manager is supplied to you for a concrete task and for the exact time period you require. You achieve maximum flexibility in staffing.

Nycomed / Pharmaceutical / Switzerland or TCG / Automotive / Austria or Westfalen AG / Chemical Industry / Germany are just some examples of cross-sector and pan-European customers who use the professional know-how and implementation expertise of aAIM.

My expertise ranges from value-oriented corporate management to management based on traditional cost and investment accounting systems in accordance with German HGB, US GAAP or IFRS. In addition to the control of the supply-chain processes, the capital market orientation is integrated dependent on the mandate.
